

An  
Indo - Italian  
Venture

## Company Profile

An ISO 9001 Company, Speedcrafts was established in 1971. Our commitment to quality and excellence has put us firmly on the industrial map of India. Our products like Road Construction Machines, Road Maintenance Machines, Road Making Machines, etc. have been used and tested in the extremes of conditions and have passed each assignment with flying colours.

"Having established an ethos of engineering excellence and product superiority for more than 30 years now, Speedcrafts Limited is committed to consumer satisfaction in terms of sales and service."

The coming years will see some new products for making super highways to handle the pressures of high volume and high speed transportation. We are in the process of forging new alliances and acquiring technologies required for making such machines. We also export our machines in Africa.

## Our Products

### Asphalt Batch Mix Plant

Asphalt Mixing Plants (batch type) are being manufactured with State of the art technology. These Plants are available from 80 to 260 TPH capacity. ➔

### Asphalt Drum Mix Plant

These are fully indigenous models of stationary and mobile plants upto 150 TPH capacity. Very well accepted both domestically and Internationally and have proved themselves in all tough situations. ➔

### Mobile Asphalt Plant

Asphalt Drum Mixing Plants (as per US Specs) are being manufactured upto 120 TPH capacity, both in mobile and stationary version. ➔

### Wet Mix Macadam Plant

An ideal machine for preparing wet mix macadam material for base and sub-base fitted with fully automatic microprocessor based controls. Available from 60 TPH to 240 TPH capacity. ➔

### Concrete Batch Mix Plant

Fully automatic stationary plants upto 60 m3/h available with design & mixer from Europe. These plants are highly advanced and durable. ➔

### Containerized Concrete Plant

Our European menu includes these container type, fully integrated, automatic plants of 36 & 45 m3/hr capacity, with design, control system and mixer from Europe.

Available in mobile and stationary version. ➔

### Mobile Concrete Plant

Compact design and fully automatic mobile concrete plant is manufactured upto 20 cbm/hr. capacity. Ease of erection and operation is the key feature of this plant. ➔

### Self Loading Concrete Mixer

With Technology from Italy, our Self Loading Concrete Mixers are manufactured using key components from Europe. These Machines are available with real Concrete Output of 1 cbm, 2.5 cbm and 4 cbm Capacity (each cycle). ➔

### Concrete Conveyor

Our transit mixer mounted concrete conveyors offer unparalleled service in placing your concrete right where you want it. Ideal for short to medium distances. Economy, flexibility, low maintenance, ease of use, high return on investment, etc. have made these machines popular all over the World. →

### Pothole Repairing Machine

Pothole Repairing Machine manufactured with latest world proven technology. This is a compact, efficient and cost effective system, based on advanced pneumatic placement technology. →

### Diesel Road Roller

Smooth wheeled Diesel Road Rollers with operating weight 8 to 12 tonnes are fitted with 4 forward and 4 reverse speed gear box. The most popular compaction machine for low density roads. →

### Road Sweeper

A very effective machine to sweep road prior to tack coating. Drive is through the PTO of the tractor and tractor hydraulics are used to lift and lower the machine on the surface to be swept. Standard sweeping width is 2.135 mtr. →

### Bitumen Pressure Distributor

Truck mounted self propelled bitumen pressure distributor with suitable heating system and variable spray bars to operate on constant pressure system. Spraying width from 2.4 to 4.2 mtr. by extension bar. →

### Paver Finisher

A mechanically propelled paver with heated, fully floating, hydraulically operated vibrating screed with mechanical controls for adjustments of height and camber. Paving with from 2.5 to 4 mtr., paving thickness upto 205 mm. →

### Mobile Hot Mix Plant

An extremely compact and fully self-contained bitumen and aggregate mixing plant, trailer mounted on four pneumatic wheels with drawbar and turntable. Capacity upto 10 TPH. →

### Chip Spreader

Our electric chip spreader, based on European design, is installed as a replacement of the rear side board of tipping lorries. An excellent machine for uniform distribution of aggregates on the road. →

## Our Products

Asphalt Batch Mix Plant | Asphalt Drum Mix Plant | Mobile Asphalt Plant | Wet Mix Macadam Plant | Concrete Batch Mix Plant | Containerized Concrete Plant

Mobile Concrete Plant | Self Loading Concrete Mixer | Concrete Conveyor | Bitumen Pressure Distributor | Trolley Mounted Bitumen Sprayer | Pothole Repairing Machine | Paver Finisher

Diesel Road Roller | Mobile Hot Mix Plant | Road Sweeper | Chip Spreader
