Scaffolding / STEGER FOR SALE & RENT.

ACCESSORIES STEGER / Scaffolding:

several kinds of other accessories that can usually be used on STEGER / scaffolding that sometimes become necessary if only an additional requirement.

A. CLAMP

CLAMP is a component used in STEGER / scaffolding that serves as a binder for the pipeline intended to support the work function maximum STEGER / scaffolding.

CLAMP consists of two kinds, namely:

1. SWIVEL CLAMP and
2. FIX CLAMP

SWIVEL CLAMP clamps life is in other words can be rotated as needed.

whereas FIX CLAMP is dead clamps that can not be moved.

B. JOINT PIN

is an additional component that is used when STEGER / scaffolding used stratified, because JOINT PIN function is as a liaison between STEGER / scaffolding between the under and above.

C. PRESS PLATE BASED

is a component replacement WHEELS / caster and JACK BASED
