Innovative solutions for paving asphalt and sub-base materials

Asphalt pavers have a long history, featuring technical and technological innovations which were greatly influenced by VÖGELE - from the first paver with hydraulic drive and ultramodern high compaction technology in screeds to a uniform, easy-to-learn concept for paver operation.

The pavers, screeds with many different compaction levels, mobile feeders and various special-purpose machines from world market leader VÖGELE make up a complete range of innovative machines for road construction. They are developed and built in a specialized factory in Ludwigshafen, the industry's largest worldwide. The name VÖGELE stands for top quality in all products and services.

VÖGELE road pavers

Vögele Super Series

Airports, multi-lane motorways, minor and municipal roads, cycle tracks and footpaths and high-durability rehabilitation: VÖGELE has the right road paver for all paving needs around the world – from the Mini Class to the Highway Class.

The Special Class includes special machines for special applications such as paving thin overlays with a spray paver or paving of compact asphalt pavements with the InLine Pave process.

CLOSE TO OUR CUSTOMERS

The right technology for every situation

VÖGELE LINE OF PRODUCTS

The right machine for every paving application. VÖGELE pavers handle pave widths from 50cm up to 16m.
